

The MarkLogic Mentorship Service

The MarkLogic Mentorship Service is designed to provide direct consulting support to new or current MarkLogic partners or customers, who are focused on knowledge transfer, technical Q&A, or direct development for hard problems.

Simply put, MarkLogic Mentorship is designed to provide pre-packaged direct expert consulting support for a variety of purposes. From knowledge transfer to direct coding support, requirements and use case analysis to simple Q&A, MarkLogic Mentorship provides as-needed support on an on-demand basis.

MarkLogic Mentorship Gives You

- **Ad Hoc Q&A** – an on-demand ability to discuss in detail any challenges you are encountering with your technology environment. Each Q&A session is specifically focused on a particular set of problems or questions, and dramatically decreases the time required for researching.
- **Direct Coding Support** – short-term, direct support for extending or updating existing MarkLogic applications.
- **Performance Tuning Support** – focused performance analysis and recommendations for specific performance related issues.
- **Requirements Analysis and Project Planning** – detailed examination of potential use cases for additional functionality in an existing MarkLogic application or project planning for developing a new MarkLogic application.

MarkLogic Mentorship is designed to accelerate resolution of any potential adoption challenges that may arise in a MarkLogic solution deployment. Having an expert consultant available to provide training, answer questions as they arise, and quickly respond to customer needs dramatically improves customer success with existing implementations and decreases time to market for new applications.

Get Started Today

Allow our highly skilled MarkLogic consultants and instructors to support your project with product training and expert technical guidance.
